SKILLS

Languages:	C, C++, Java, Python, SQL
Web Technologies:	HTML, CSS, JavaScript
Frameworks:	React, Scikit-learn, TensorFlow, Pandas, NumPy, Matplotlib, Seaborn, SHAP
Tools/Platforms:	MySQL, Power BI, Jupyter Notebook, Google Colab, Git, GitHub, Cisco Packet Tracer, Linux
Soft Skills:	Problem-Solving, Time Management, Leadership, Adaptability, Quick Learner

INTERNSHIP

AICTE VOIS Virtual Internship – Conversational Data Analysis with LLMs	Sep 2025 – Oct 2025
- Optimized conversational data analysis by refining 30+ complex prompts to improve LLM response consistency and ensure a 98% precision rate in data interpretation. - Executed strategic content analysis on a dataset of 7,787 Netflix titles using Python and Pandas to identify dominant genres and global market gaps - Spearheaded an exploratory data analysis of 102,058 NYC Airbnb listings, uncovering a strong correlation (0.99) between pricing and service fees to inform host strategies.	

PROJECTS

AI-Powered Cardiovascular Risk Assistant (GenAI Enabled) Live Link	Feb 2026 – Mar 2026
- Built an AI-based healthcare system Combining Logistic Regression-based risk prediction with LLM-generated explanations for cardiovascular assessment. - Orchestrated a hybrid workflow linking predictive analytics, rule-based logic, and natural language reasoning for interpretable outputs. - Created and deployed a Flask web application enabling real-time risk evaluation with probability-driven insights. - Delivered an intelligent decision-support solution simulating agentic AI behavior for personalized recommendations. Tech: Python, Flask, Scikit-learn, Pandas, Google Gemini API	
Predictive Staffing Planner for Aadhaar Seva Booths Live Link	Dec 2025 – Jan 2026
- Formulated a lifecycle-based pressure scoring model (MBUPI) to forecast biometric update demand across four states and 100+ districts. - Profiled inter-state and intra-district demand skew, identifying that ~10% of districts account for the majority of upcoming workload, with Hyderabad emerging as a top-risk district. - Designed an interactive dashboard to visualize regional pressure trends and support proactive workload management. - Proposed data-backed staffing strategies to optimize resource allocation and minimize service congestion. Tech: Python, Pandas, Scikit-learn, Seaborn, Streamlit	

TRAINING

From Data to Decisions: A Hands-On Approach to Data Science LPU Skill Development	Jun 2025 – Jul 2025
- Executed end-to-end data analysis workflows in Python, transforming raw data into actionable insights. - Implemented machine learning pipelines including feature preparation, model evaluation, and validation. - Applied analytical libraries (Pandas, NumPy, Scikit-learn, Matplotlib) to solve structured data problems. - Delivered concise analytical summaries, translating results into decision-oriented insights	

CERTIFICATIONS

Oracle AI Autonomous Database 2025 Certified Professional – Oracle Link	Oct 2025
Oracle Cloud Infrastructure 2025 Certified Networking Professional – Oracle Link	Oct 2025
Oracle Cloud Infrastructure 2025 Certified AI Foundations Associate – Oracle Link	Oct 2025
Cloud Computing – NPTEL Link	Apr 2025

ACHIEVEMENTS

Completed Microsoft Fabric Data Days and the Global Data Visualization Challenge.	Nov 2025
Finished Google's 5-Day Agentic AI Program, gaining hands-on agent-building experience.	Nov 2025

EDUCATION

Lovely Professional University Bachelor of Technology - Computer Science and Engineering; CGPA: 7.22	Phagwara, Punjab Aug 2023 - Present
Krishnaveni Arts & Science Junior College, Khammam Intermediate; Percentage: 89.5	Khammam, Telangana Jun 2021 - Mar 2023
T S R School & Junior College Matriculation; Percentage: 100	Khammam, Telangana Apr 2015 - Mar 2021
